

Create Addition Problems to 10

5

$$5 + 5 = 10$$

$$+ = 10$$

$$+ = 10$$

$$+ = 10$$

$$+ = 10$$

$$+ = 10$$

$$+ = 10$$

$$+ = 10$$

$$+ = 10$$

$$+ = 10$$

Teacher: Place two or more sets of Number Cards 0 through 10 face-down in a deck. The children draw Number Cards and write the number in the first blank in an equation. They use strategies (counting on, the number line, etc.) to determine the number needed to total 10 and write that number in the second blank. They repeat for the other equations.
