Let's make a fruit salad.  
We have some **red** cherries.

We have an orange.  
It's **orange**.  
(I wonder why it's called an orange?)

We have a pineapple.  
It's **yellow** inside.

We have a **green** pear.

We have some **blue** blueberries.

We have a bunch of **purple** grapes.

We have a coconut.  
It's **brown** on the outside and  
white on the inside.

What can we do with this big **black** bowl?

We'll put the **red** cherries,

the **orange** orange,

the **yellow** pineapple,

the **green** pear,

the **blue** blueberries,

the **purple** grapes,

and the **brown** and **white** coconut

into the big **black** bowl.

Yum! Let's eat!

# How did this food grow?

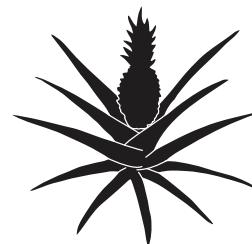

**Grapes** grow on vines.

**Blueberries** grow on bushes.

**Pineapples** grow on a low spiky plant.

**Cherries, pears, and oranges** grow on trees.

**Coconuts** grow on palm trees.

## About the Author and Photographer

Faith Gowan grew up in a home buzzing with creative projects. Both of her parents were artists, and she and her sisters and brother were always encouraged to make things. To this day, Faith is happiest when working with her hands: shaping something out of clay, sewing a quilt, knitting a pair of mittens, or even preparing a colorful fruit salad! Faith lives in Colorado with her husband and two children.

## Additional Photo Credits

The children enjoying fruit salad on pages 20-21 were photographed by Judi Bruckner. (Special thanks to Carlos, Oliviana, Marisa, Patrick, Victoria, and Kito!) Photography on pages 22-23 courtesy of Wikimedia Commons (blueberry bush, orange tree, pear tree, cherry tree) and Corel (grape vine, pineapple plant, coconut palm).
